Direction générale des services et de la promotion de la santé

FOREWORD

This publication contains listings of all research projects, studies, conferences, workshops, project formulations and research trainees and career investigators assisted by the National Health Research and Development Program (NHRDP) in 1979-80 and 1980-81. During these two years, the NHRDP spent a total of $19 345 000, including $4 314 000 for the development and maintenance of health research manpower.

We hope that the publication of this information will not only promote a greater sense of awareness of current health research initiatives in Canada, but will also illustrate, for the benefit of the potential NHRDP applicant, the range of activities eligible for financial assistance.

The NHRDP is a mission-oriented program, aimed at stimulating and assisting scientific activities designed to advance national health goals. As such, the goals and objectives of the Department of National Health and Welfare's Health Protection, Medical Services, and Health Services and Promotion Branches influence the nature of activities eligible for financial assistance.

AVANT-PROPOS

Cette publication contient un inventaire de tous les projets de recherche, les études, les conférences, les colloques, les groupes de travail, les élaborations de propositions de projets, ainsi que tous les stagiaires en recherche et les boursiers de carrière subventionnés dans le cadre du Programme national de recherche et de développement en matière de santé (PNRDS) en 1979-1980 et en 1980-1981. Pendant ces deux années, le PNRDS a dépensé un montant de $19 345 000, y compris $4 314 000, pour le développement et le soutien d'une main-d'oeuvre en matière de recherche en santé.

Nous espérons que la publication de ces renseignements donnera non seulement une meilleure connaissance des initiatives de recherches courantes en matière de santé au Canada, mais qu'elle montrera également aux requérants éventuels le champ entier des activités susceptibles d'être subventionnées par le PNRDS pour une assistance financière.

Le PNRDS est un programme à vocation spécialisée qui a pour but la stimulation et l'appui d'activités scientifiques destinées à promouvoir des buts nationaux en santé. Par conséquent les buts et objectifs de différentes directions générales du Ministère de la Santé nationale et du Bien-être social, notamment: Protection de la santé, Services médicaux et Services et Promotion de la santé influent sur le genre d'activités aptes à recevoir une assistance financière.

Canada

The NHRDP does not, however, operate in isolation from Canada's health research community. Indeed, the success of the Program is due largely to the encouragement, advice and support we receive from health research workers at numerous centres across Canada, who generously share with us their precious time and expertise. Through the medium of this publication, we should like to express our sincere appreciation to those individuals named on the following pages, who have served on our Advisory Committee and on our review committees, and to the hundreds of others who have taken the time to carefully review the scientific merit of numerous grant and contribution applications.

Le PNRDS, cependant, ne fonctionne pas isolé de la communauté de recherche canadienne en matière de santé. En effet, le programme n'aurait pu réussir sans l'encouragement, l'appui et les conseils des chercheurs de toutes les régions du Canada qui ont généreusement partagé leur temps et leur expertise avec nous. Cette publication nous permet de remercier sincèrement les personnes mentionnées dans les pages suivantes qui nous ont rendu service en tant que membres de notre comité consultatif ou d'un de nos comités de révision. De plus, nous tenons à exprimer notre reconnaissance à des centaines d'autres qui ont pris le temps de réviser soigneusement le mérite scientifique des nombreuses demandes de contributions ou de bourses.
